

**Berkshire Community College**  
**Announces**  
**Intersession 2006-2007**

**Course offering:**

**MAT-800-01 Mathematics Modules      1 Credit**

M-T-W-TH-F      1/2/2007-1/19/2007      8:45am-12:00pm      K-214

Instructor: Daniel Healy

Students intimidated by regular mathematics courses will find a new approach in the Math 800 Series, which allows students to progress at their own rate, decide individually when they are ready to be tested, and to work and study in a no-failure environment. The results of the BCC Learning Skills Assessment will determine where the student starts; individual effort and program requirements determine where the student stops.

This series covers materials in 20 modules, from basic arithmetic through Precalculus. Students can advance at their own rate, and credit is given individually. The series is designed for those who have been "turned off" by traditional mathematics classes yet need the basic skills necessary for their career goals or for preparation for more advanced mathematics courses.

Students who wish to undertake studies in mathematics as included in the Math 800 series should select MAT 800 for one, two, or three credits.

**Registration information**

Currently enrolled BCC students can begin to register on Tuesday, Nov. 14. All other students can begin to register on Monday, Nov. 27.

Tuition and fees of \$122.50 per credit are payable at the time of registration.

Complete a registration form and obtain the signature of your advisor or an advisor in the Academic Advising Center (Field 117).

Students should register prior to December 15 as cancellation decisions will be made after that date. The registration deadline is Wednesday, December 20 for the intersession course.
